# Handwritten message

Hi, Recipients!

I am glad to help you achieve your life goal of creating a big family. I wish you to be healthy and happy in this changing world. I hope you will take care of your children and understand that they are more individuals than part of you. Thus, you should understand that they have their desires and respect their choices instead of enforcing yours.

Best Regards,

## Describe one of your favorite vacations to another country:

My favorite kind of vacation is a European country tour because they are quite small and you can see lots of different cultures and people in a small period. # Donor essay

## Why do you want to be a donor?

I like to help other people and I also like to be paid. I suppose this is a good and simple opportunity to do both simultaneously

## Describe your relationship with your family. How has your family shaped your values and who you are today?

I was close to my parents during my childhood. However, to me, they seemed too caring sometimes. After I moved to my flat we were in contact much less, around once at two or three weeks. But after 25 I became less egotistical and started to understand the values of family relationships so we started to communicate more often.

Currently, my family is located in Russia so it is not so easy to be in touch. Nevertheless, we have a Skype call every week to share the news and gossip a little bit. They are not thrilled that I prefer to travel around the world instead of taking a mortgage in Moscow and creating my own family, but they respect my choice and accept it.

## What makes you unique?

First of all, I suppose every person is unique in terms of feelings, character, and vision of the world. In the other hand I suppose nobody is really special and equally is just a small part of humanity from the point of historical and biological evolution. So I am just a usual Russian guy who tries to see the world before the end and be happy.

## What are you most proud of and why?

I am most proud of my ability to live as an independent person and be able to do what I want and take responsibility for my actions. I can pay my bills, help my parents, and comply with main humanity principles. I do not feel any guilt about being myself and do not take the common path. I suppose the main milestones on this path were starting my post-graduate education, leaving an underpaid job, singing in a choir, and relocating to the US.
