# Donor essay

## **Why do you want to be a donor?**

There are two main reasons: 1) I would like to bring happiness of becoming a parent with those who are in need, 2) I truly believe that my genes are worth sharing

## **Describe your relationship with your family. How has your family shaped your values and who you are today?**

I have more than warm relations with all my family members. My relatives and my family are proud of me. My father was my main moral guide over life. He taught me what is good and what is bad. How important it is to treat other people in a fair way. How important it is to love and protect your family. How important it is to not betray anyone. My mother taught me that my brain is extraordinary and that I have to work hard to reveal my potential. She also taught me that love is the main thing in life. Both my mother and father taught me a lot about managing other people and how to become a leader. They also shaped my family oriented life-style.
